Background, Objectives and Methodology

Background and Objectives

- Volunteers are critical to the successful delivery of frontline services and are essential in building community capacity and enhancing community resilience. Queensland Fire and Emergency Services (QFES) has approximately 42,000 dedicated volunteers across the state in the State Emergency Service (SES), Rural Fire Service (RFS), Research and Scientific Branch network, and Technical Rescue Unit.
- The volunteer base is largely made up of the RFS and SES with approximately 36,000 and 6,200 volunteers respectively.
- Across both of these services, the contribution of volunteers is vital in ensuring positive community outcomes, and as such it is imperative that the views and opinions of the volunteer base is heard. Only in this way can QFES understand the satisfaction of its volunteers, how it is performing in supporting them in their volunteer role and what can be done to improve their volunteer experience.
- In 2016 TNS has been commissioned to follow up and build on the 2014 survey it conducted to ascertain current levels of satisfaction and opinion on the support provided and organisational practices and processes.
- The findings of the 2016 volunteer survey are contained within this report.

The overall aim of the research is to:

Provide Queensland Fire and Emergency Services with robust measures of volunteer satisfaction with the services provided in order to provide direction and understanding as to what, if any, issues exist and how volunteers can be better supported in the future.

Methodology

Who did we survey?

- Volunteers in Rural Fire Service (South Western)

How many responses did we receive

- n=403 (maximum margin of error at 95% confidence interval is $\pm 4.9\%$)

When did we interview?

- 11 July – 23 August 2016

Sampling strategy

- Contacts from the QFES Volunteer database were emailed with an invitation to complete the survey. The survey was also distributed via hard-copy on request and at SES training nights, and a link to the survey was also placed on the QFES website.

Interview methodology

- Online, self-completed interview. Average questionnaire length 10 minutes.

Weighting

- No weighting was applied

Questionnaire Flow

- The questionnaire covered the following content:

1 Screener questions

2 General satisfaction

3 Perceptions of RFS

4 Recruitment

5 Leadership

6 Workplace conduct policies and procedures

7 Inclusion

8 Information and Communication

9 Recognition

10 Training and development

11 Intention to continue volunteering

12 Demographics

Reporting Notes

- While the online survey required a forced response for each question, some respondents who completed a hard copy of the survey skipped certain questions. As such, sample sizes may vary slightly throughout the report.
- Where a total satisfied score is reported, this is calculated as the sum of satisfied + very satisfied.
- Where a total dissatisfied score is reported this is calculated as the sum of dissatisfied + very dissatisfied.
- These aggregated scores may not always add exactly to the individual percentage scores reported due to rounding.
- For single response questions, the sum of responses may not always add exactly to 100% due to rounding.
- Where questions have more than one response allowed, the sum of responses may add to more than 100%.
