

## Fires Incidents at Queensland Schools for Financial Years 2018/19 to current

Fire incidents at Queensland Schools defined as A23 = 110 - 129 (Structure fires), A19 = 21 (complex type is Primary and Secondary educational use).

Incident Type (A23) defined as the most serious situation that occurred whether it still existed when QFES arrived or not.

Action taken (A24) is defined as the primary function performed by QFES personal at the incident site.

Estimated Percentage of Property involved on arrival is based on the reporting officer's estimation on first arrival. This value is only completed when the incident type (A23) is between 110 and 119 so there are blank values for A23 120-129.

Data entered by the entering officer based only on the information that was available to him/her at the time of the incident. This information is subject to change as incident reports can be edited as part of ongoing data quality practices.

Data from OMS database from 01 July 2018 to 02 June 2022, and current as at 14/06/2022

A3_Station	A4_Incident_No	FinancialY	A6_Alarm_Date	A23_Type	TypeOfIncident	A17_Suburb	A18_Postc	ActionTaken	TYPE OF OWNER/OCCUPANT	% of property involved on arrival
